# CHAMELEON TINT

On first glance, the “chameleon” tint looks like a slightly dark film, but in reality, the creation of this tint takes over 200 layers of different polyurethane materials. With the help of modern technology, the tint does not fade even in the brightest conditions.

It is made so that you could never become tired of the amazing chameleon effects that differ depending on the weather, lighting, and angle of view. This tint also provides great visibility for the passengers inside. Therefore, the "chameleon" name reflects the ability and tendency to change depending on its surroundings.

# Who Are We?

## PIONEERS IN NEW GENERATION TINT

We started our business back in the U.S. in 2004 to become pioneers in a new type of tint. Now, we are a business with customers all over the world!

Our tint is made in the U.S.A., but to reach our worldwide customers we have several distribution centers in Eurasia and North America. We are proud to report that we have more than four hundred factory employees and more than two hundred fifty sales representatives worldwide. Last year, we reached our goal of delivering more than 400,000 rolls of tint with the help of our UltraVision family.

The pillars of our company is excellent customer service and consistent quality and progress. We believe in consistently improving our tint formulas and continually forming relationships all over the world, both with tint shops and direct consumers!

# CLIMA COMFORT/ OPTIMUM / NIGHT LINE

---

Clima Comfort 83%

## SAME CHAMELEON TINT, DIFFERENT DARKNESS

The popular Clima Comfort line, or more commonly known as the “blue” tint, has the one of the strongest chameleon effect with deep blues at different angles. This also has a golden hue from the inside to help with night visibility!

Optimum 55%

You can choose your preferred VLT (visible light transmittance) to give you privacy while still being above the legal limit in most localities.
